Putting Beauty into Travel – surprising, sustainable and safe

Your trusted partner for best-in-class hotel amenities. Surprising, sustainable and safe: at ADA, personalized hotel cosmetics of the highest quality have been our passion for more than 40 years.

1979

Our vision for tailor-made hotel cosmetics changed the amenities market worldwide.

1990

We disrupted the hotel industry once again, with the introduction of the first-ever dispenser system, press + wash.

2008

We pioneered eco-friendly cosmetics for hotels, launching the ADA Green Collection.

2012

We introduced a new and innovative generation of closed dispensers, our SmartCare System – once again raising the bar for safety and hygiene.

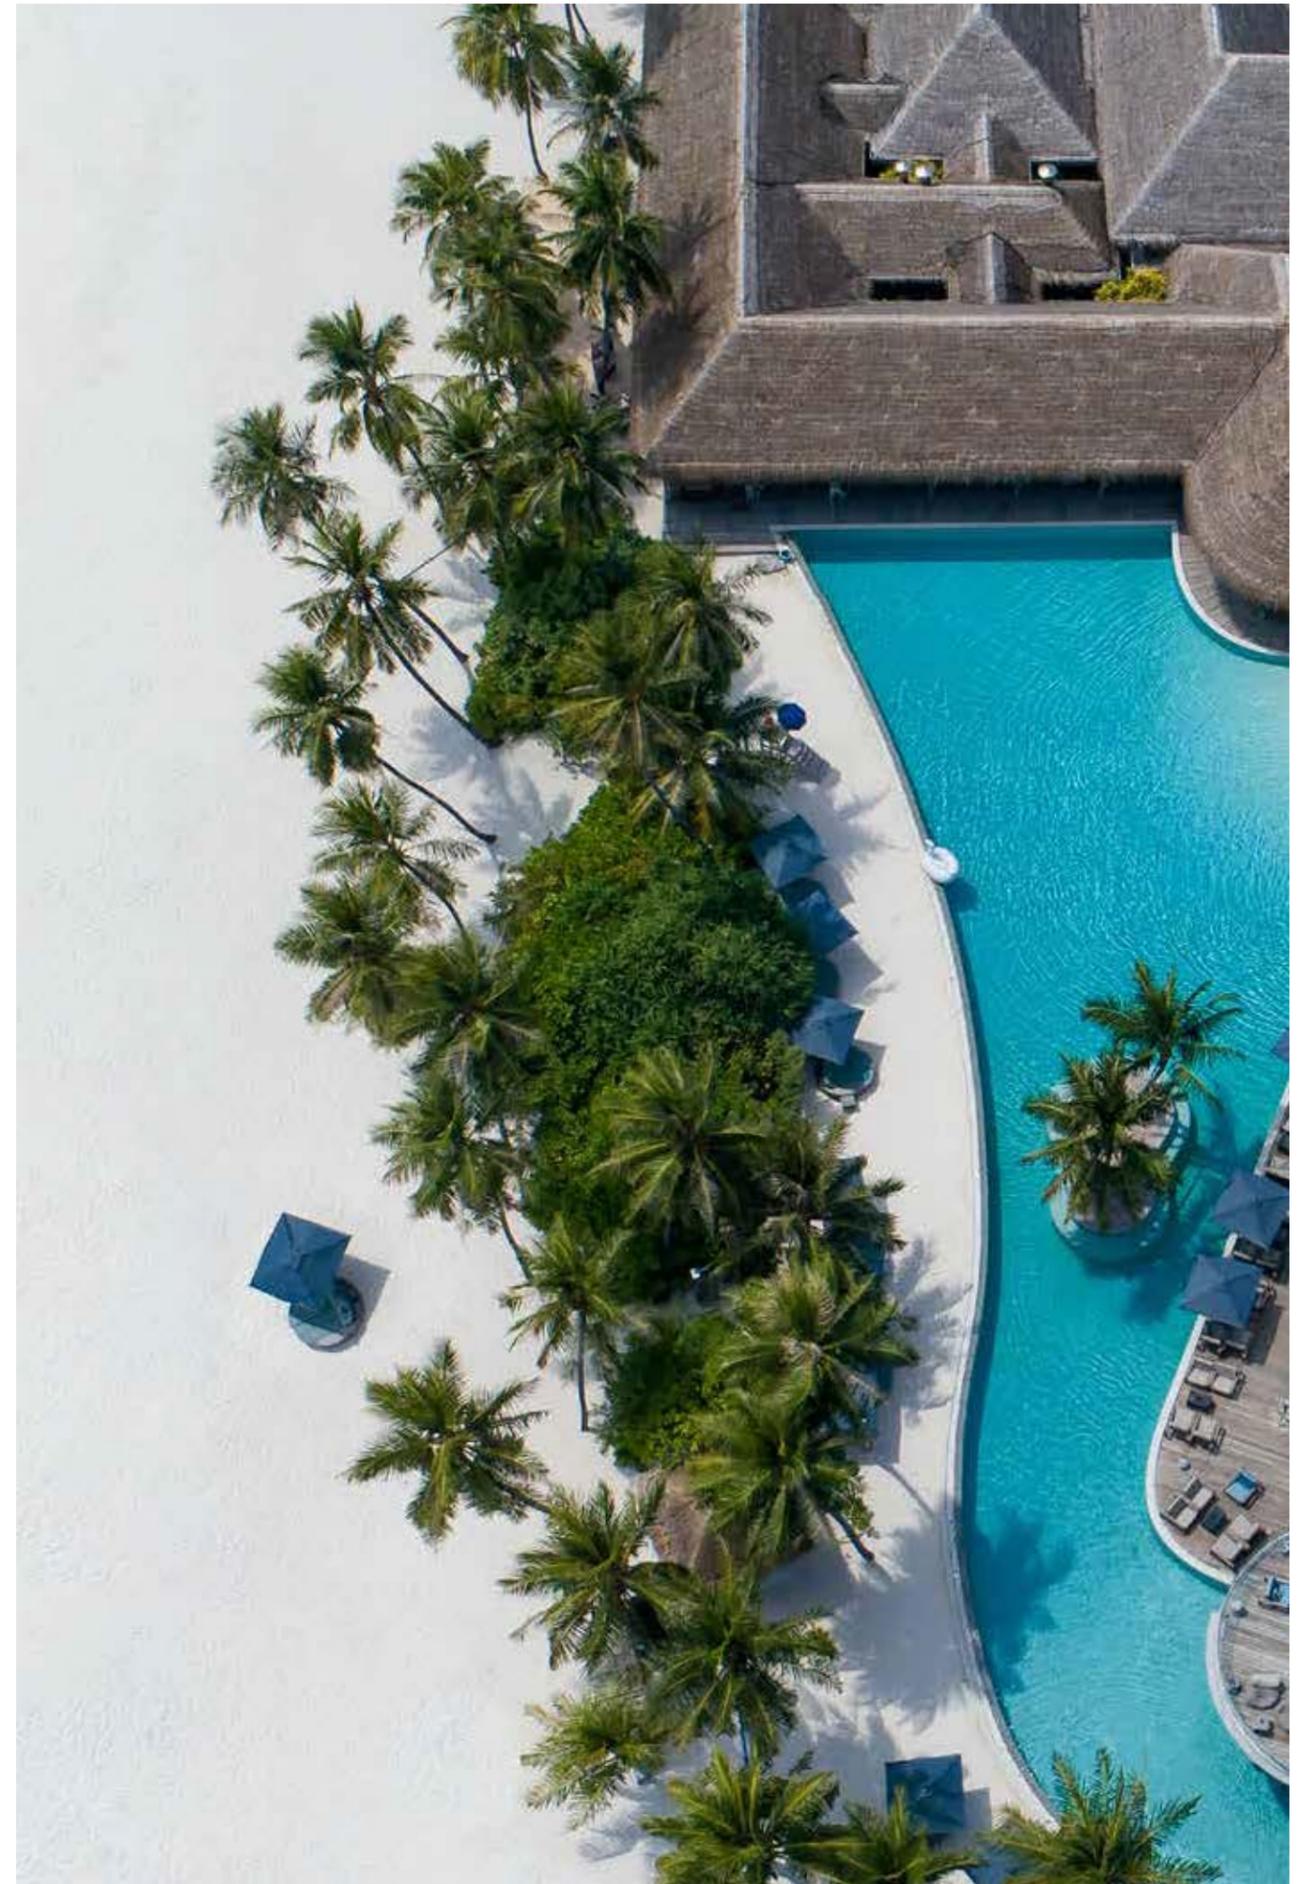

From the very beginning, our goal has been to support hotels in creating moments of well-being for their guests during every single trip.

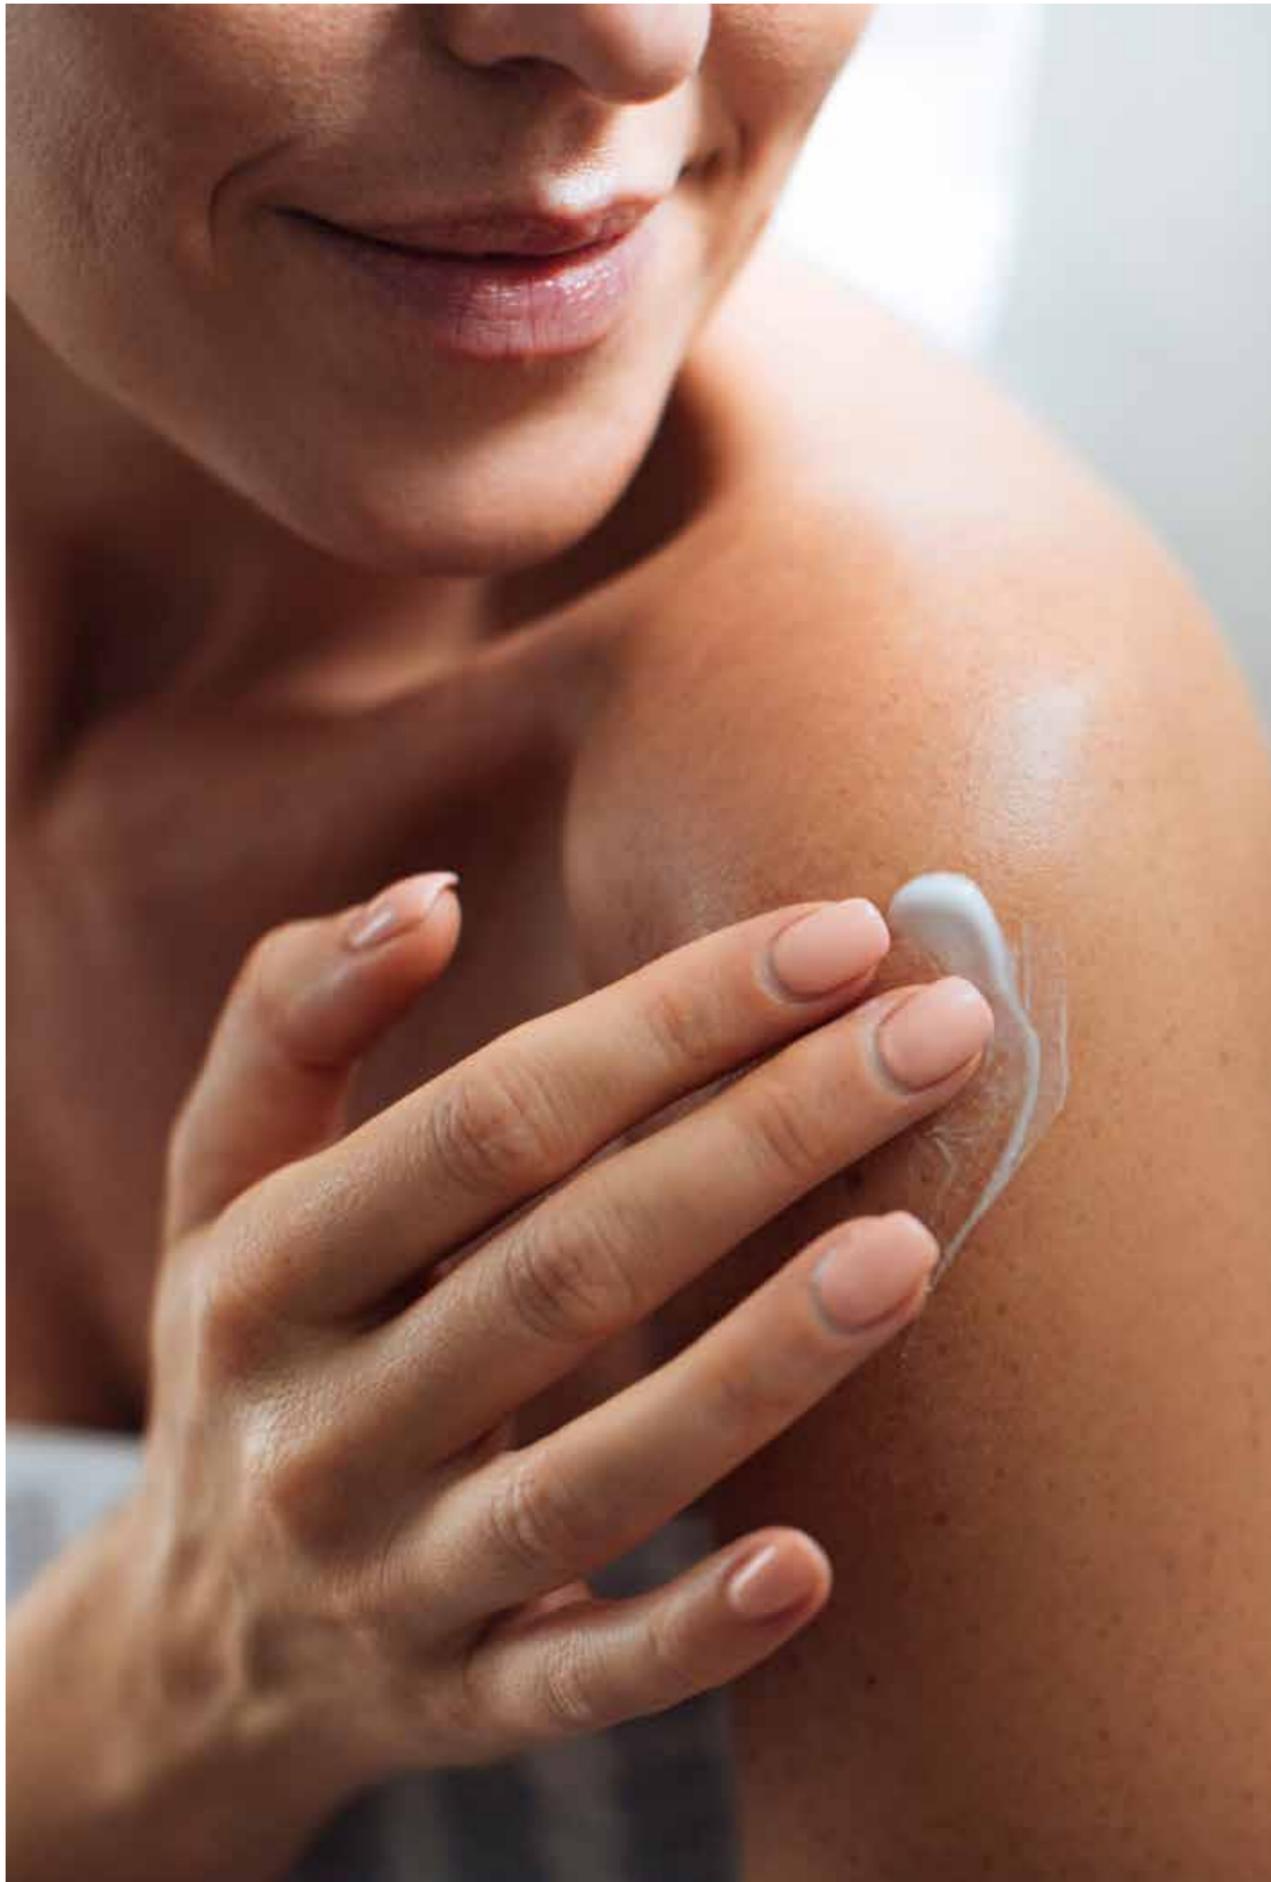

Today, ADA Cosmetics is a partner for hotels around the world, serving over 30,000 customers internationally. A global top three company in our field, we are a single-source provider of hotel amenities – we develop, manufacture, and distribute our products worldwide.

More than 660 employees of over 30 nationalities are part of our mission to put beauty into travel, which is supported by:

- More than **four decades of skincare expertise**
- Industry-leading **sustainability standards** and goals
- **Pioneering** dispenser solutions for ultimate hygiene
- Outstanding **customer service** from day one
- The ADA **House of Brands**, our unique product portfolio

Take a deep dive into our world with our 2024 Catalogue. Explore our wide variety of brands within these pages, and select an amenities collection that not only perfectly reflects the identity of your hotel, but also enriches and elevates the everyday experience of your guests.

Superior skincare for every guest

Your guests deserve the best. Ensuring a memorable personal care experience is part of every trip, thanks to our expertly formulated hotel amenities.

A busy travel schedule, possibly involving lack of sleep or a change in climate, can put additional stress on the skin – and moments of self-care can be hard to find. Providing your guests with high-quality in-room amenities invites them to take time for themselves during even the most hectic day, and enhances the experience of every trip.

Ensure they enjoy gentle and effective care tailored to a wide variety of skin types, including dry and sensitive, thanks to our expertly developed and dermatologically tested collections.

State-of-the-art formulations

The health and safety of your guests is our top priority, and every single product we create is rigorously tested to the highest standards. Dedicated to scientific research from the very beginning, we have been developing industry-leading formulations for more than 40 years. Our experts at our manufacturing facilities in Germany, the Czech Republic, and Malaysia never stop researching, testing, and optimizing.

Responsibly sourced natural ingredients

With a focus on plant-based, natural ingredients, all ADA products are pH skin neutral and vegan, while also being free from liquid microplastics and benzophenone UV filters. You will never find ingredients of concern, such as parabens, silicones, or formaldehyde donors, in our collections – our strict Responsible Sourcing Policy takes care of that.

Certified to the highest standards

Don't just take our word for it – our collections have been certified by leading, internationally recognized standards for natural and organic cosmetics, including the EU Ecolabel, Nordic Swan Ecolabel, and Ecocert Cosmos Organic. What's more, we are the only manufacturer of hotel amenities whose entire product portfolio is Cradle to Cradle Certified Silver.

Our promise: Formulations without nasties

No parabens

Due to the potential risk and debate surrounding these materials, ADA has decided not to use these ingredients in our products until scientific data provides sufficient evidence that there is no risk to our consumer.

No mineral oils

Although cosmetic grade mineral oil is a safe material, we do not use it because of its negative impact on the environment. It is made from non-renewable sources that are only available in limited quantities. Herbal alternatives, while more expensive, also offer additional skin benefits such as nourishment and soothing.

No microplastics

Microplastics are washed off the skin and hair and end up in the environment, where they can cause lasting damage to the flora and fauna. We avoid both microbeads and soluble microplastics in our newly developed formulas.

No nanomaterials

We do not use nanomaterials in our formulas due to their potential impact on the environment.

No MIT and MCIT preservatives

Due to the potential risk of causing allergies and the debate surrounding these materials, ADA has decided not to use these ingredients in our products.

No silicones

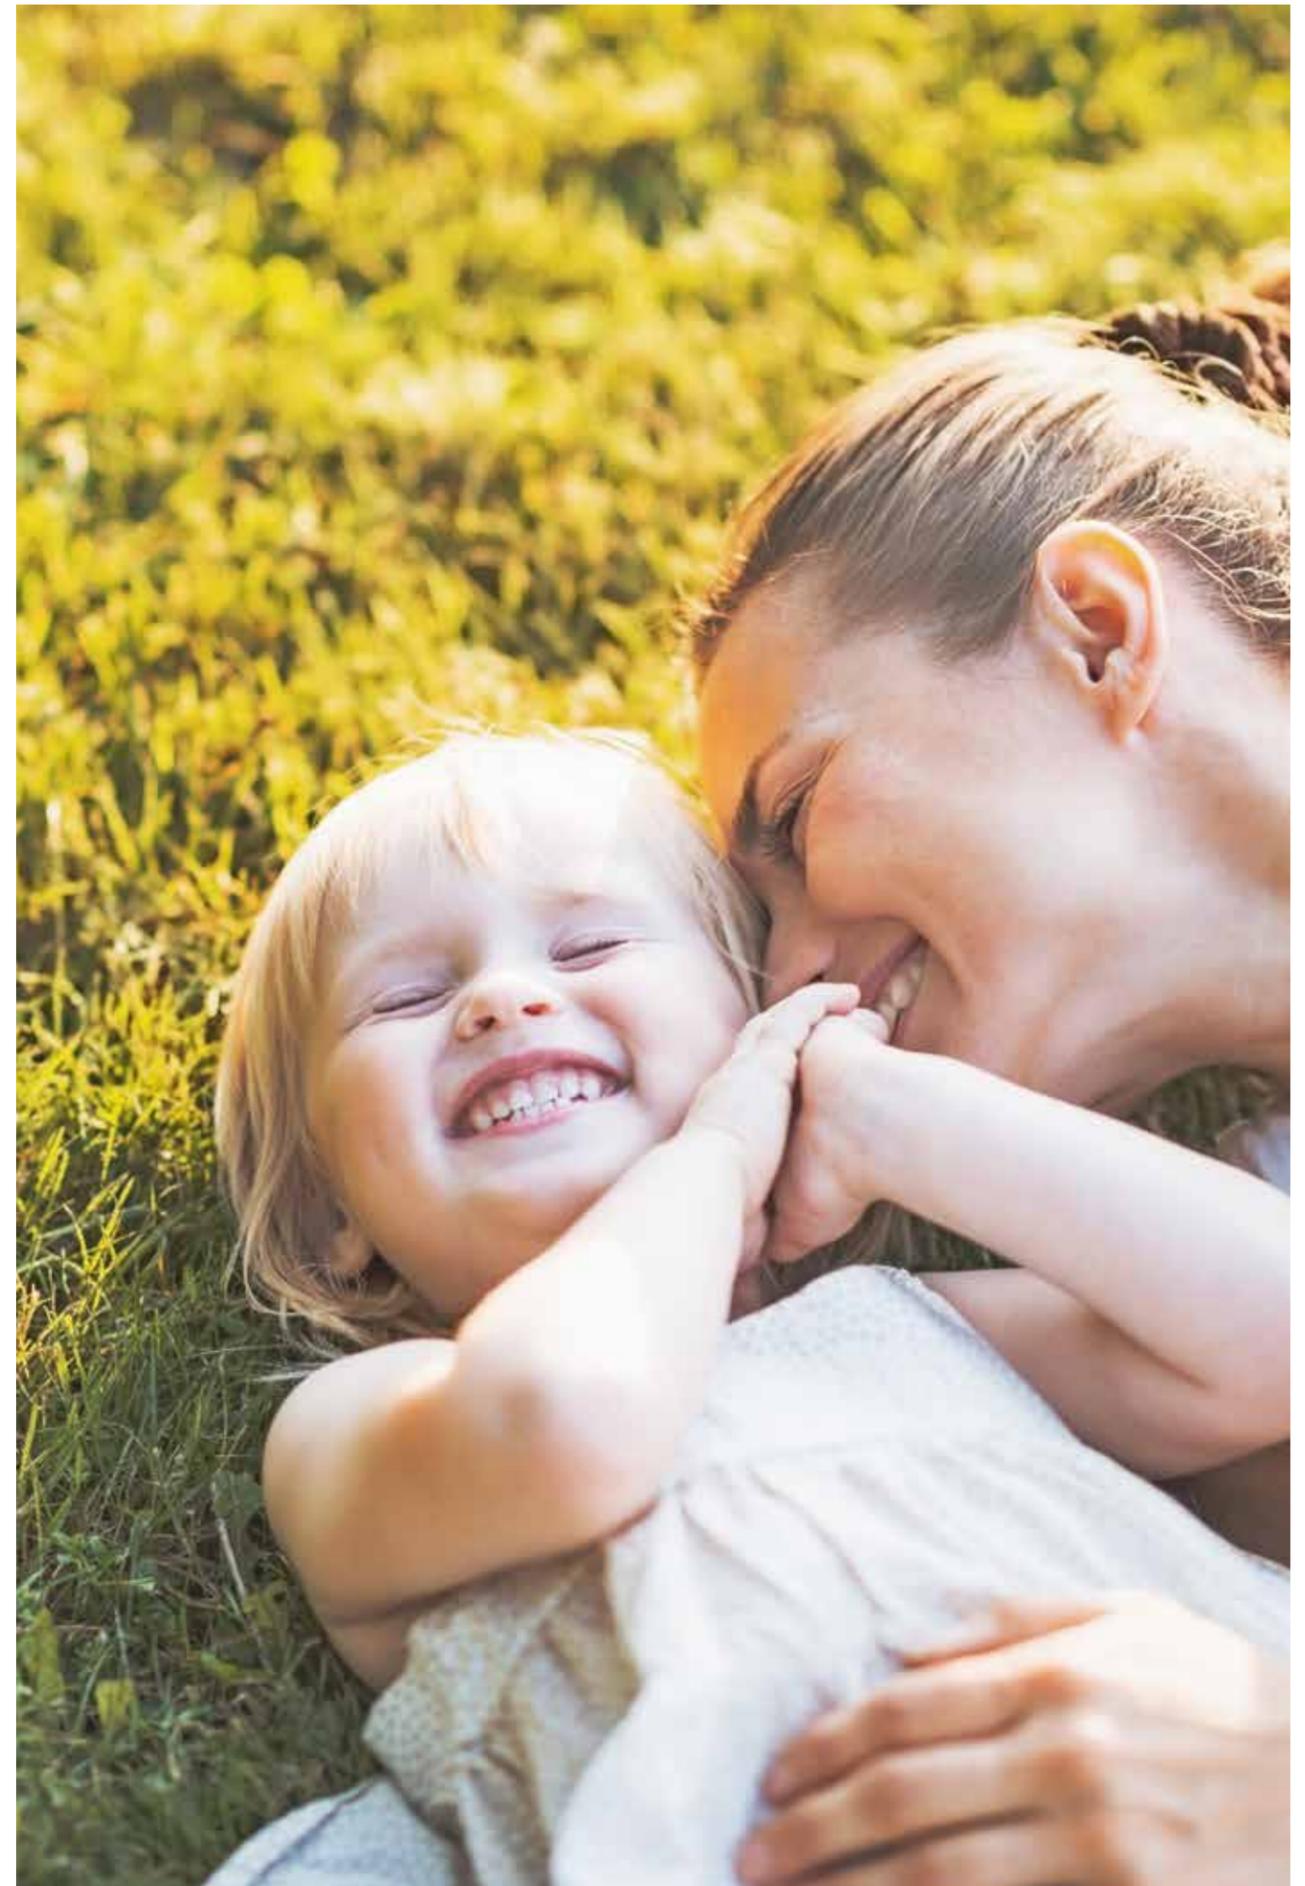

Some silicones contained in cosmetic products are water-insoluble, or do not completely dissolve in water. Therefore, we do not use them.

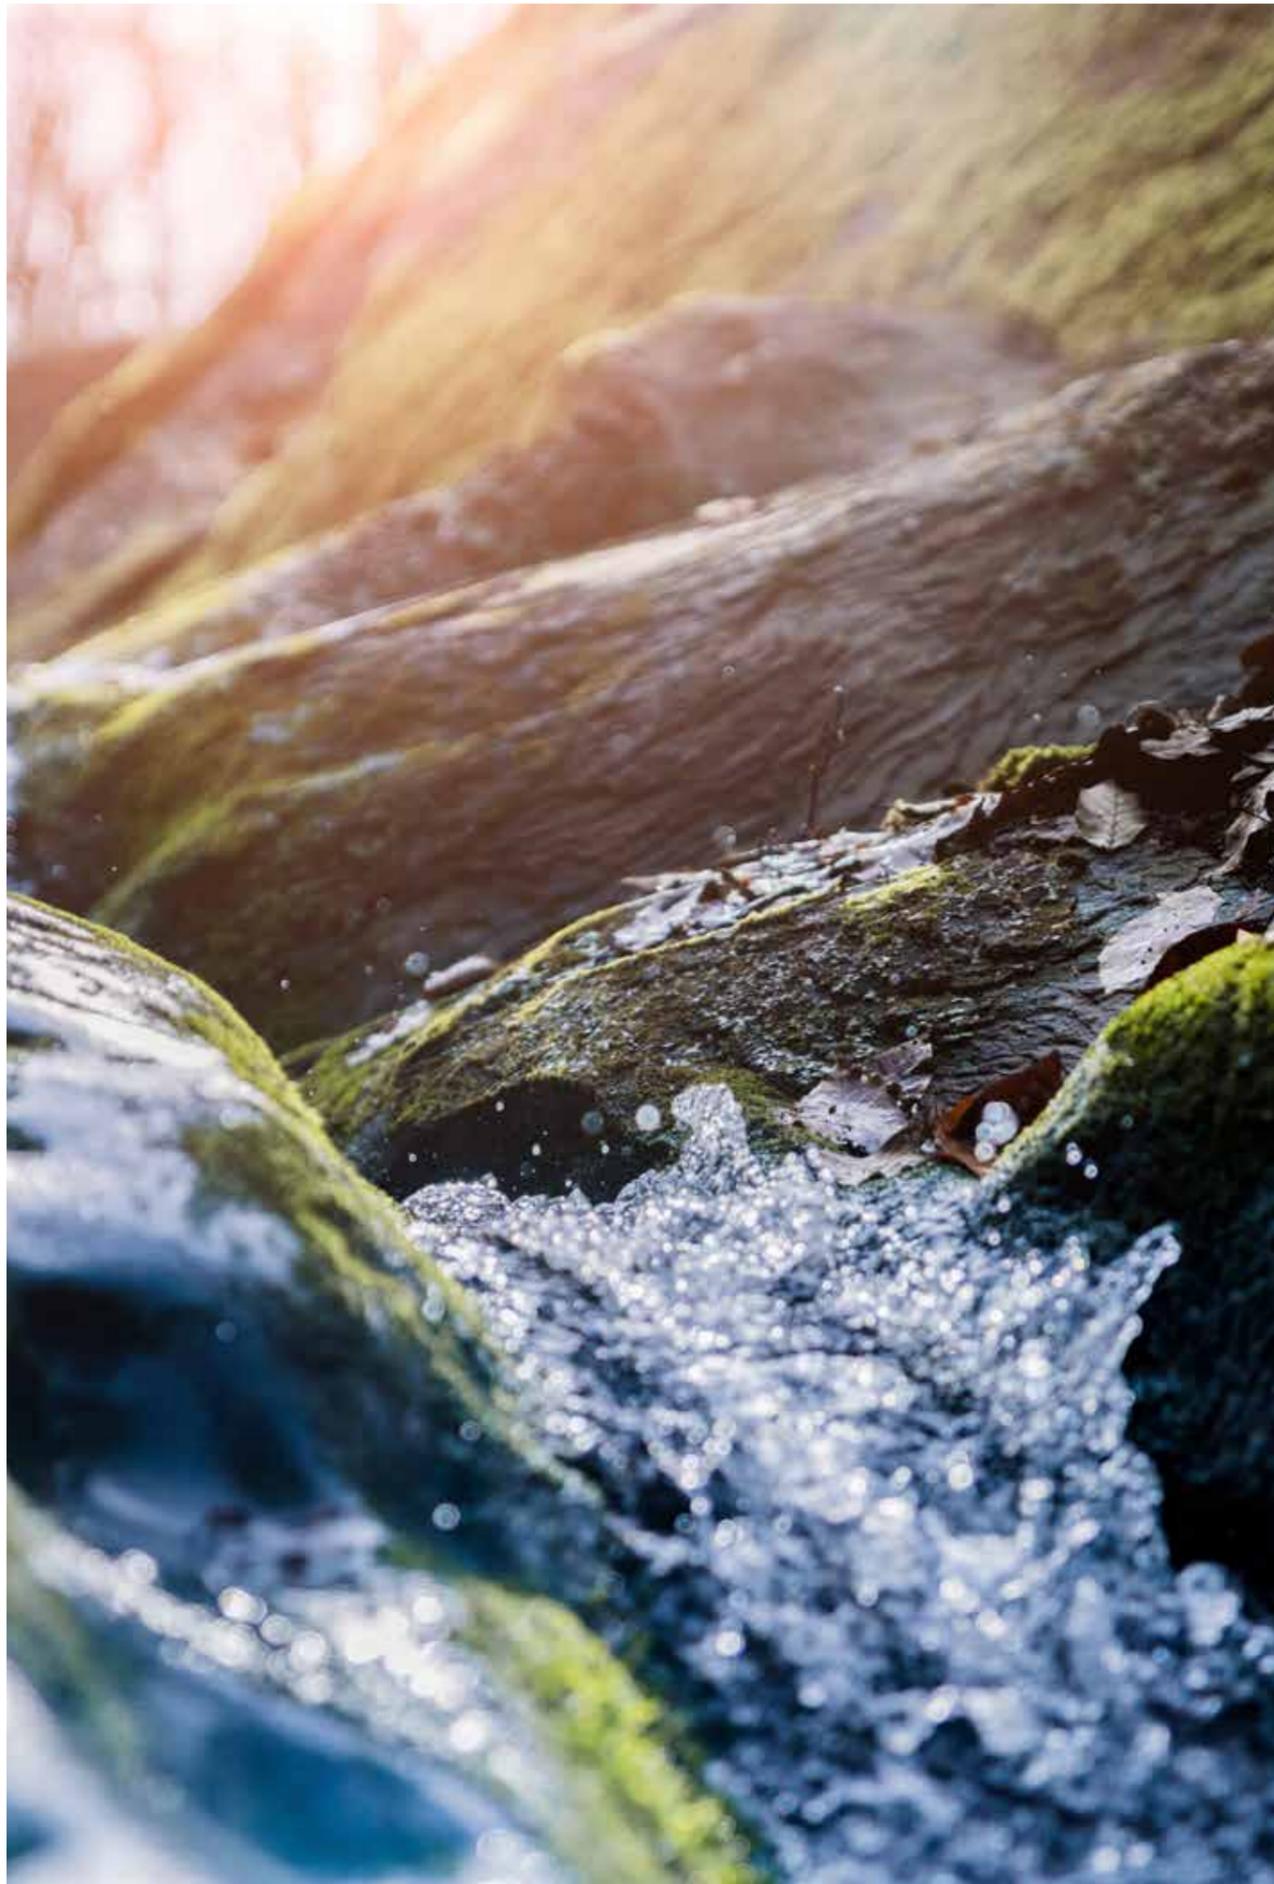

No benzophenone UV filters

These filters are suspected of being endocrine disruptors, of polluting surface waters, and of endangering aquatic organisms. Therefore, ADA has decided to proactively remove all types of benzophenone from our formulas. The safety of clients has absolute priority.

No formaldehyde releasers

There are also some preservatives that are not formaldehyde themselves, but can split off formaldehyde. Although these are permitted for use in cosmetics, we do not use them due to the associated risks.

Conscious choices, trip by trip

Safe. Circular. Responsible. By developing high-quality amenities that are gentle to the planet, we enable you and your guests to contribute to a better tomorrow.

Our actions today change the world that we live in tomorrow. At ADA, our commitment to the environment shapes everything we do. We understand the importance of sustainability to you and your guests, and support you with amenities that are:

- Developed according to eco design principles
- Easy to recycle
- Refillable

Avoiding the use of small plastic bottles, thus helping to reduce the tide of plastic waste, has been our goal from the very beginning, and we created the very first dispenser system for hotel cosmetics more than 30 years ago.

Leading in circularity

We are proud to be **the only company in the hotel industry** whose product portfolio is **Cradle to Cradle Certified® Silver**, demonstrating our commitment to the circular economy. This renowned, holistic certification assesses not only ingredients and packaging materials, but also production processes and behavior. Our global approach is to “think circular” in everything we do.

MEASURES

Smart and sustainable packaging solutions

We minimize waste through all phases of the product lifecycle. The RecyClass Online tool allows us to assess and improve our packaging, and we have maximized our use of PCR plastic to conserve valuable resources. Our pioneering dispenser solutions save countless small plastic bottles, and we are also reducing the weight of our packaging and soaps, in order to further cut waste and emissions.

Reducing our carbon footprint

We have set ourselves clear and ambitious decarbonization targets, aiming to achieve a 35% reduction in our CO₂ emissions by 2026, in comparison with 2022. A variety of initiatives in our production facilities around the world contribute towards this goal.

Just one example: all of our cleansing formulas such as shampoos, shower gels, and liquid soaps are now produced using a state-of-the-art cold process, meaning we do not need to heat tons of water during their production. This saves up to 45kg of CO₂ per ton of finished product.

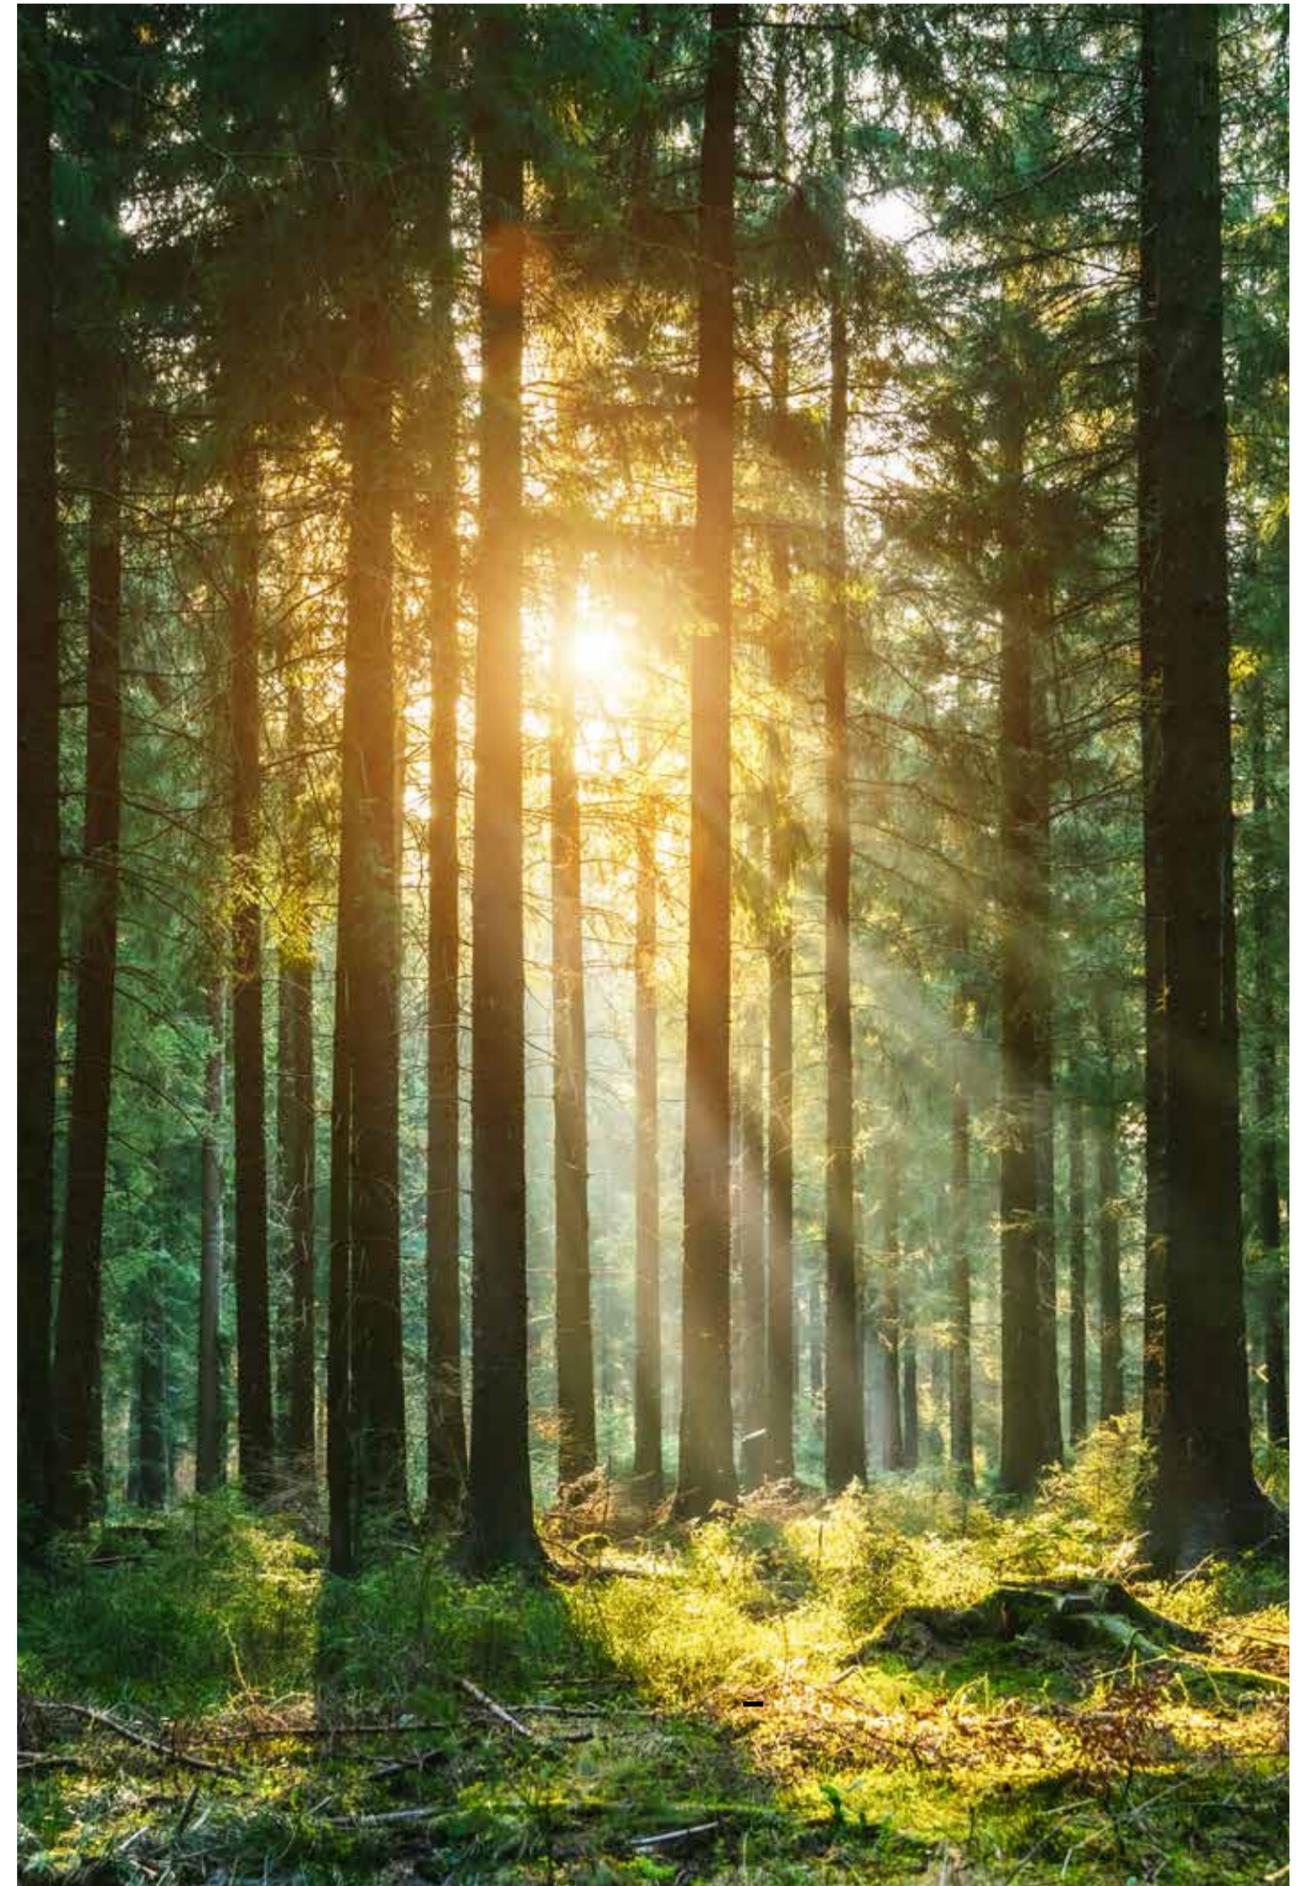

Rooted in nature

Our 100% vegan products are formulated with gentle, effective, and natural ingredients. In a sign of our clear engagement for animal welfare, no ADA products or ingredients are tested on animals, and we also require non-animal-testing certification from our suppliers.

Socially responsible

We actively support sustainability initiatives including The Ocean Cleanup, which aims to clean up 90% of floating plastic pollution; Canopy, an initiative to protect the world's forests; and Clean the World, which recycles discarded amenities into newly made soaps for impoverished communities.

Our annual Sustainability Report tracks and reports on our progress towards our goals. ADA is also part of the Advisory Board of Commit for our Planet, an industry-wide initiative to reduce our collective environmental impact. By adopting a transparent and open approach to sustainability, we encourage others to follow our lead.

Ultimate Hygiene

Enjoy peace of mind with our hygienic dispenser solutions, guaranteed to prevent liquid contamination and protect your guests' health

Guest safety is our priority. The majority of pump systems on the market can fail and allow liquid contamination, creating a hygiene risk in hotel bathrooms. With this in mind, we have developed a range of advanced pump dispenser solutions that guarantee 100% hygienic protection, including SmartCare, SHAPE, and our new mono-material pump dispensers.

Not only are these the most hygienic solutions available anywhere, they are also the most sustainable. Fully recyclable thanks to their mono-material design, they can also be safely refilled and reused. From 2024 we offer a refill service for all of our solutions, including SmartCare and SHAPE.

The world's most hygienic dispenser system

ADA is the developer of the original SmartCare dispenser – our bestselling system with a best-in-class safe and hygienic design. Our latest innovation, SmartCare, adds a new safe-lock seal to its patented membrane technology, for the ultimate guarantee of perfect hygiene.

SmartCare is tested by the independent Rhine-Waal Institute in Germany and guarantees:

- No dripping
- No back contamination
- No wear-out effect

Designed for well-being

All of our ADA dispenser systems are developed with guest safety in mind, and we continually seek to perfect our proprietary designs.

Our new pump dispenser prevents contamination due to its internal construction with a locking system, and our advanced SHAPE system incorporates a tamper-proof, secured pump system engineered for precise, effortless dispensing and zero back contamination.

Explore our different dispensers, as we continue to lead the hygienic and sustainable movement in hotel amenities for the well-being of you, your guests, and our planet.
